ONE MINUTE PRODUCT MEETING

TempoCem®ID

TempoCem®ID delivers a standout performance by blending in. Unlike other clear temporary cements, the innovative formulation of TempoCemID allows the clinician to detect excess cement (even below the gum line), which can often be removed in one piece. This esthetic-oriented, temporary cement is invisible when you want it to be, yet detectable when you need it to be.

Formulated for optimal transparency, TempoCemID will never impact the shade of your provisional, making it an ideal choice for both posterior and anterior restorations alike. Non-eugenol TempoCemID flows and mixes easily, doesn't stick to instruments and is indicated for temporaries lasting six months.

FEATURES & BENEFITS

- › Invisible under restorations, yet detectable for excess removal
- › Beautiful esthetics thanks to optimal transparency
- › Easy one-piece removal of excess
- › Optimal adhesion with easy removability
- › Eugenol-free formulation
- › Excellent ease of use; no sticking to instruments
- › Flows and mixes easily for ideal handling

COMPANION PRODUCTS

- › Luxatemp
- › LuxaFlow Ultra
- › LuxaBond
- › LuxaGlaze

PROCEDURES

- › Temporary cementation of crowns, bridges, veneers, inlays, onlays and temporary restorations
- › Temporary cementation of provisionals on implants
