ONE MINUTE PRODUCT MEETING

Honigum Pro

The better the impression, the better the restoration. Honigum Pro is the only VPS impression material that goes where you want it, stays where you place it and has the unique ability to thin under load. It makes its way into tiny crevices and hard-to-reach areas that other impression materials can miss.

Honigum Pro's true thixotropic formula won't slump or run, but remains stable where you place it. It also exhibits remarkable strength to resist tearing upon removal, preventing the need for retakes.

DMG's rapid "Snap-Set" technology provides an unbeatable combination of generous working time, even while still in the mouth, while offering a conveniently short intraoral time.

FEATURES & BENEFITS

- › Exhibits dynamic viscosity when placed under pressure
- › Flexible working time
- › Rapid snap-set technology
- › Maximum tear strength
- › Extremely hydrophilic
- › Subtle honey aroma

APPLICATIONS

- › Crowns
- › Bridges
- › Inlay/Only
- › Full-mouth restorations
