Icon Caries Infiltration & DMG **DentaMile** Bleach Trays

3D Printing & Icon:
Two breakthrough technologies unite

First, we changed how dentists treat white spots with the **Icon Caries Infiltrant**. Now, we've made it faster and easier for dentists to fabricate same-day custom bleach trays in-house, with our **NEW DMG DentaMile digital workflow**.

By establishing a proper treatment protocol for Icon that includes bleaching recommendations with a 3D-printed in-house digital bleach tray workflow, clinicians can streamline the treatment process and add revenue while reducing labor and material costs.

DMG DentaMile:
In-house, validated 3D printing bleach tray workflow

The complete, user-friendly 3D printing solution with software, hardware and materials all work together seamlessly, for easier, faster, better bleaching trays.

Whether your scanning, networking, designing, printing or all of the above, DMG offers a fully-guided dental fabrication workflow!

The Whitening Market

Teeth whitening accounts for 32% of in-office practice because 99.7% of people in the country perceive a smile as their most important social asset[1]. In addition, North America captured the largest share of the teeth whitening global market in 2022 [2].
